## R Data Package

This paper is an example of open and reproducible research that uses only open software and data sources for image processing analysis. We obtained all data from publicly available sources and organized them in the form of the Amazon-ULC R Data Package. Aiming to keep the peer review process anonymous, we provide the R Data Package file in the Zenodo Repository: [10.5281/zenodo.7749057](https://doi.org/10.5281/zenodo.7749057) and do not reference it in the manuscript file.

## Acknowledgments

This research was funded by "Conselho Nacional de Desenvolvimento Científico e Tecnológico" (CNPq), grant number 131352/2021-0. This study was financed in part by the "Coordenação de Aperfeiçoamento de Pessoal de Nível Superior - Brasil" (CAPES)-- Finance Code 001 and with the support of Global Affairs Canada, through the Emerging Leaders in the Americas Program (ELAP).
